 Portfolio Website

Skills

Frontend

React.js, HTML5, CSS

Languages

C++, Rust, JavaScript, Python, SQL

Backend

Node.js, Express, REST APIs

DevSecOps

Basic CI/CD Pipelines, Git/Github

Blockchain

IPFS, Smart Contracts,
Cryptography basics

AI/ML

NLP, Computer Vision (OpenCV),
Tesseract OCR, TensorFlow/
DeepSeek.

Projects

Automated Document Processor, (OCR & NLP)

- Developed a Python-based script using Deepseek OCR and OpenCV to extract text from scanned invoices and identity documents.
- Built an automated Python script to parse unstructured data into structured formats. Designed efficient logic to handle file I/O operations.

MediSim AI - Diagnosis Trainer

- Built a simulation tool for medical students using Generative AI techniques to mimic patient interactions

Exoplanet Explorer

- Built a machine learning model using NASA datasets to classify alien planets as exoplanets.
- Deployed a web application to visualize the classification results with decent accuracy.

Neurify

- Created an AI-based browser extension that functions as a grammar assistant, similar to Grammarly.
- Developed a browser extension using JavaScript and API integration. Focused on real-time data processing and user interface responsiveness.

Education

08/2024 – 03/2028

Bachelor of Technology (Computer Science), *Techno NJR Institute of Technology* 

My academic focus is on building secure, scalable infrastructure, with a deep dive into **Cyber Security** and **DevSecOps**. Beyond the curriculum.

Others

Toastmasters International: Member of Toastmasters International – Regularly participate in speech contests, honing communication and presentation skills
